

## Unrivaled Quality & Experience

Two numbers sum up Michels mainline pipeline construction: 10,000 and 1. The former represents the miles of mainline we have built in diameters up to 42 inches. The latter is the priority we make each customer, community and team member.

Michels believes in implementing reliable cutting edge technology in the hands of our skilled people to install oil and natural gas pipelines. Michels offers a broad complement of services to provide increased convenience and efficiency on every project. From minor repairs and maintenance to large scale pipeline construction, the most respected names in the energy industries rely on Michels to utilize the most advanced technology and equipment to deliver unrivaled quality workmanship.

- Capacity to simultaneously construct multiple mainline spreads
- Involved in some of the largest pipeline projects in North America
- Our involvement in pipeline work includes more than 1600kms of 20-inch, 30-inch, 36-inch and 42-inch pipelines
- We take pride in our reputation for quality work performed safely and with care for the environment

**we do that.**
